# Eco-VENEER

*Realistic & more...*

The Eco-VENEER self-adhesive endless foil has a paper-based decorative surface. It can be easily bonded by hand or glued on appropriate laminating systems. Air-flow technology removes surplus air during the coating process. Depending on the substrate, the foil can be removed at any time without leaving any residue behind and complies with the finish-foil resiliences in the furniture industry. The surface options available are virtually unlimited: a range of lacquers in different gloss grades and finishes, and options for chemical and mechanical embossing.

Paper based

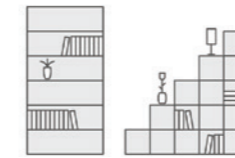

Shrink free

Eco-VENEER is a self-adhesive furniture foil. We have developed it especially for the furniture industry. You can glue them indoors on all flat surfaces.

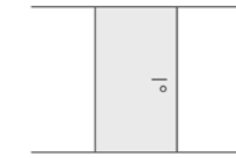

Eco-VENEER is paper based and has a "high tech" interface. The structures are not only visually stunning - you can also feel them when you stroke them with your hand.

Eco-VENEER can be glued easily and bubble-free. With the air channel technology, you can delete the excess air to easily edge.

Eco-VENEER can be repositioned any number of times. So you can apply the foil several times while pasting and then detach it again. The maximum bond strength is reached only after 24 hours.

Shelves

Doors (inside)

Tabletops

You want to stick Eco-VENEER in your fridge? Of course no problem! Eco-VENEER has a temperature resistance from Arctic -20°C to sweaty 80°C.

Because unlike conventional self-adhesive films Eco-VENEER is dimensionally stable due to the paper-based structure. This means that the film always stays in shape and does not "shrink" under different temperatures. Thus, you enjoy your decor for a long time.

But let's be honest, Eco-VENEER does best not in the fridge but on your kitchen fronts, chests of drawers, shelves, doors (inside), tables and cupboards.

## Application
